Custom Manufacturing

Pik Rite, Inc. is a custom designer and manufacturer of commercial vacuum tanks. We are known throughout the industry for producing tanks built to work the way our customers work. Our tanks feature premium vacuum pumps, components and high quality protective paint finishes. Pik Rite can engineer trailer or tractor mounted pump systems. We also provide a complete line of after-market parts and can service all your repair and maintenance needs.

What Our Customers Are Saying

We customized our trailers slightly to our liking and Pik Rite was very, very easy to work with on that. Hands down we love the Pik Rite trailers over the other brands we're running. ~~~**Scott McCrea, Dynamic Structures, Inc.**

We really like the air ride suspension. The advantage is you don't bounce as much, the tank sits lower and the center of gravity is lower on Pik Rite's compared to the other ones we have. We also like that the trays on the side are only chest high. You can walk up there and get your hoses on and off without reaching over your head.

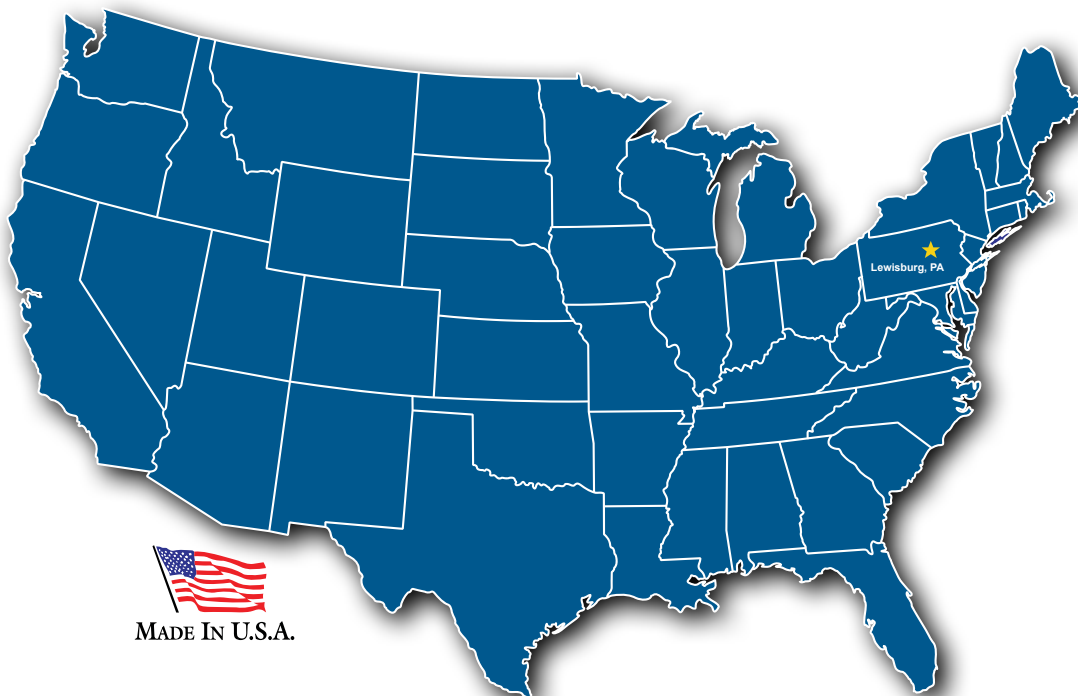

~~~**John Simon, Clear Creek Environmental**

I wanted a custom trailer and I wanted it big. One of the features I like is the catch pan in the back to catch the water. We came up with that design idea together. It's all working good and when the time comes, I would buy another one.

~~~**Nathan Jennings, Canton PA**

OUR MISSION

Pik Rite, Inc. is a designer and manufacturer of innovative quality-built equipment. We are committed to providing our employees with the best opportunities possible to foster growth in both their personal and work skill, while meeting customer needs and desires by supplying functional and fairly-priced products.
